ABSTRACT

This paper provides a sample of a \LaTeX document which conforms to the formatting guidelines for *ACM SIG* Proceedings. It complements the document *Author's Guide to Preparing ACM SIG Proceedings Using $\text{\LaTeX}2_{\epsilon}$ and BibTeX*. This source file has been written with the intention of being compiled under $\text{\LaTeX}2_{\epsilon}$ and BibTeX.

The developers have tried to include every imaginable sort of “bells and whistles”, such as a subtitle, footnotes on title, subtitle and authors, as well as in the text, and every optional component (e.g. Acknowledgments, Additional Authors, Appendices), not to mention examples of equations, theorems, tables and figures.

To make best use of this sample document, run it through \LaTeX and BibTeX, and compare this source code with the printed output produced by the dvi file.

1. INTRODUCTION

This is introduction.

2. BACKGROUND

This is background.

3. OVERVIEW

This is overview.

4. RUNTIME

This is runtime.

5. EVALUATION PLAN

This is evaluation part.

6. CONCLUSION

This is conclusion.

7. ACKNOWLEDGMENTS

This section is optional.
